

THE COMPLETE PYTHON COURSE

TOPICS COVER

1. Introduction to Python
2. Python basic
3. Conditional Statements
4. Lists
5. Loops
6. Functions
7. Strings
8. Dictionary
9. Tuple
10. Sets
11. Exceptional handling
12. File handling
13. Oops Programming
14. Multi threading
15. Modules

PYTHON

Python is a programming language.

Used

Web programming

Mobile Application

Data Science

Machine learning

AI

Game development

GUI programming

Database programming

Features of Python

- Simple and Easy to Learn
- Open source
- General purpose
- Procedural and Object – Oriented
- Huge library

Python basic

- Print(function)
- Variables and Comments
- Variables naming
- Input(function)
- Data Types
- Operators
- F – String
- Type conversion

Exercise

- Sum two numbers
- Sum two string
- Count any string from user input
- BMI Calculator
- Life in days
